S I R:

SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Submitted herewith is the English language version of the International Search Report 3 pages in English PCT/ISA/210 by the EPO European Patent Office as the international searching authority from the present international application listing 10 cited references. Two of these references, namely DE 195 22 574 and WO 98 42897 (in English) are also disclosed on page 4 of the specification. The two references not in the International Search Report that are disclosed and/or discussed in the specification, namely WO 99/31306 (page 4 of specification) and EP 0164928 (specification Pgs. 2-3) were filed by applicants on February 14, 2002 and are both in English. The 10 references cited in the International Search Report have been transmitted to the PTO by the International Bureau (PCT/IB/308) as acknowledged in the Notification of Missing Requirements dated May 2, 2002.

In the International Search Report the references listed in category A mean these references define the general state of the art which is not considered to be of particular relevance with respect to the listed claims. The references listed in category X means each document is of particular relevance; the claimed invention cannot be considered novel or can not be considered to involve an inventive step when the document is taken alone with respect to the listed claims. The references listed in category Y mean these documents are of particular relevance with respect to the listed claims; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more such documents, such

combination being obvious to a person skilled in the art. The International Search Report provides the relevant portions English. Also with respect to all of the references on the PTO-1449 sheets the US patents, the Patent Abstract of Japan, the PCT WO Publications and the European Patent Publications are in English, and one of the four listed specification references, namely EP 0164928, is also described in the translated specification (on pages 2-3), so no further concise explanation of relevance should be required.

A copy of the previously submitted PTO-1449 form (2 pages) is presented listing 12 references, namely 10 disclosed in the International Search Report and 2 additional references as mentioned above.

Translations of the foreign language references are not available to the undersigned.

This submission meets the requirements of 37 CFR §1.56, 1.97 and 1.98(a) and MPEP 609.

Respectfully submitted
Johannes Kaeppler, et al
